

# LANDI Connect MDM

Manage all your devices and apps from one centralized platform with ease. Safeguard sensitive data, maintain operational integrity, and gain control over your platform costs.

## LC Cloud

A multi-tenant deployment on Amazon Web Services, hosted and operated by LANDI Global, cost-efficient with quick onboarding for organizations of all sizes from any industry.

## LC Enterprise

A private deployment either on AWS under your account or on physical servers in your business location, operated by your company with full control.

### Device Management

Effortlessly monitor your devices and update your devices in bulk with the latest apps, OS releases, and parameter settings.

### Remote Assistance

Technicians can diagnose and resolve issues in real-time by remotely accessing terminals, reducing downtime and minimizing impact on productivity.

### App Distribution

Curate your own collection of apps and seamlessly distribute them to your devices. Gain access to high-quality apps certified and supported by our partners.

### Secure Architecture

Our dedication to security extends across our terminals, apps, platform, and SDK, ensuring protection for user data, compliance with legal regulations.

# LANDI CONNECT MDM DATA SHEET

The data sheet below is based on LC Cloud 3.4 and LC Enterprise 3.3.

Key Feature	Description	LC Cloud Free Plan	Cloud Standard Plan	LC Enterprise
Unified Platform	• Support devices with different OS: Android, Embedded Linux, Windows, RTOS	●	●	●
	• Support both payment devices and non-payment devices	●	●	●
	• Support non-LANDI Android devices <sup>1</sup>	●	●	●
	• Same user account for multiple organizations	●	●	●
	• Web API for third-party integration	●	●	●
Device Status Monitoring <sup>4</sup>	• Inspect device information including software and hardware specifications	●	●	●
	• Inspect battery, network type, memory, storage and CPU usage	●	●	●
	• Inspect installed apps	●	●	●
	• Inspect historical data including update log, online log, etc.	●	●	●
Map & Geofencing <sup>4</sup>	• Display device location in map with address and positioning details	●	●	● <sup>5</sup>
	• Define geofences and get alerts if the devices are outside	●	●	● <sup>5</sup>
	• Inspect out-of-fence device location history	●	●	● <sup>5</sup>
	• Claim device ownership	●	●	●
Ownership & Delegation	• Transfer device ownership to partners	●	●	●
	• Delegate the management of a subset of devices to sub-accounts or partners	●	●	●
	• System firmware upgrade	●	●	●
Device Configuration <sup>4</sup>	• Kiosk mode with optional access to settings like Wi-Fi	●	●	●
	• App auto-launching	●	●	●
	• Multi-app Kiosk mode	●	●	●
	• Default input method	●	●	●
	• Custom wallpaper	●	●	●
	• Custom boot animation	●	●	●
	• Device USB debug protection	●	●	●
	• Google setting and Google Play switch	●	●	●
	• GPS setting	●	●	●
	• Display settings (density and resolution) <sup>6</sup>	●	●	●
	• Speaker volume	●	●	●
	• Scanner setting	●	●	●
App Distribution & Installation	• Language & time zone <sup>3</sup>	●	●	●
	• APN	●	●	●
	• Screen timeout <sup>3</sup>	●	●	●
	• Super permissions <sup>3</sup>	●	●	●
	• Custom launcher <sup>3</sup>	●	●	●
	• Manage Android, Linux and sandbox apps	●	●	●
	• Greyscale deployment for Android app	●	●	●
Payment App Support	• Private App Center with configurable banner and recommended apps	●	●	●
	• Access to the apps listed in the Public App Center	●	●	●
	• App installation & un-installation	●	●	●
	• Disablement of Unknown Installation Source	●	●	●
	• App blocklist & allowlist	●	●	●
Remote Assistance <sup>4</sup>	• App anti-uninstallation	●	●	●
	• Submit Android apps to Public App Center <sup>2</sup>	●	●	●
	• Share Android apps privately with partners <sup>2</sup>	●	●	●
	• Update EMV kernels on the devices <sup>3</sup>	●	●	●
	• Edit app parameters online and push to devices <sup>3</sup>	●	●	●
	• Reusable app parameter templates <sup>3</sup>	●	●	●
	• Inspect details of installed payment apps, including kernels and parameters <sup>3</sup>	●	●	●
	• Online app signing <sup>3</sup>	●	●	●
	• Shutdown/restart device	●	●	●
	• Send message with text and image to devices <sup>3</sup>	●	●	●
Account Management	• Remote desktop: view and interact with Android device desktop	●	●	● <sup>5</sup>
	• Lock/unlock device	●	●	●
	• Reset device	●	●	●
	• Retrieve device logs for troubleshooting	●	●	●
	• Remote ADB: debug devices remotely	●	●	●
	• Transfer files to/from device	●	●	●
	• Clear screen password	●	●	●
	• Remote control device via PC app <sup>3</sup>	●	●	● <sup>5</sup>
	• Manage users and define roles with customizable permissions	●	●	●
	• Manage sub-accounts and apply App Center options	●	●	●
	• Manage partnerships with other users on the platform	●	●	●
	• Add a partner who does not have partner account <sup>7</sup>	●	●	●

1. Android SDK available for building custom agent apps to connect Non-LANDI devices.

3. Features planned for upcoming releases.

5. Features require customers to subscribe to third-party services at their own cost.

7. Features available only to authorized LANDI hardware distributors.

2. Features available exclusively for solution partners.

4. Features dependent on device models.

6. Features available only to partners who specifically requested.
